

Southwest Arkansas Beekeepers Hive Building Workshop

Saturday, March 25

10:00 am - 2:00 pm

Location: Howard County Farmers' Market at 110 South Washington in Nashville.

Build from Kits: Bring your kit hives (tops, boxes, bottoms, foundation and frames) to assemble during this workshop. If you do not already have your kits, you should still have time to order out of the catalogs, by contacting Southwest Arkansas Beekeeping Supplies or by going online.

Acquiring Your Kits: We will have 2017 catalogs at our next monthly meeting, Thursday, March 9. If you wish to order from Southwest Arkansas Beekeeping Supplies in Fulton, contact James and Rita Lamb at (870) 896-2200 during shop hours or leave a message. Their shop is open each Thursday and Friday from 9 - 5 and Saturday from 8 - noon. James says they will take orders from anyone who needs kits and deliver the kits to the workshop! We will have glue, nail guns and jigs to make assembly easier and some extra bodies to help out! *Even those without kits are welcome to attend and learn!*

Junior Beekeepers - This is one of the training programs required for our SWABK Junior Beekeepers in order to be certified. Even for those who already have their hives, this is a great opportunity to learn!

Coffee and refreshments provided. Lunch will be potluck, so everyone is invited to bring a dish to share! We will have plenty ice, paper plates and utensils.

Please call Debra Bolding at (870) 557-2352 or email dkb1032@gmail.com to sign-up (we need a head count for supplies and refreshments!)
